### **Topricin Helps Heal Damage Causing Pain**

*Years after surgery on my wrist I have moments when the pain is intense. It can be unbearable to write at times after hours of work on the computer. I've tried a number of prescribed medications, but prefer natural therapy to taking drugs. And at last, I've found something that helps relieve my pain. Topricin® goes beyond merely relieving symptoms but instead stimulates my body's ability to heal the damage that is causing the pain.*

While I believe seeking the care of a physician is important, I think the best approach to my health care is to voice my concerns about taking an abundance of pills to relieve my pain. To speak up when I feel the treatment is not working, and to ask for a alternative approach to treatment.

Topricin® is the culmination of many years of research in the area of regulated natural medicines. The result is a patented topical biomedicine technology that incorporates a combination of homeopathic medicines that work synergistically to relieve pain and to reduce inflammation in joint and soft tissues that include the nerves, muscles, and tendons. Topricin® aids in the healing process by improving blood flow to injured tissue and by draining toxins and fluids that build up as a result of injury or ailments, like osteoarthritis.

Topricin is odorless, greaseless and has no counter-irritants, volatile oils like capsaicin, menthol, camphor, or chemicals to irritate or burn the skin and it will not interfere with any medication. One of the key benefits of Topricin® is it has been shown to reduce the need for oral pain medication all together for a great number of users.

Topricin is highly recommended by Medical Doctors, Pharmacist, Physical Therapists, Chiropractors and Massage Therapists who see their patients get better faster using Topricin during and after therapy sessions and can be used by anyone who suffers from: osteo-arthritis, carpal tunnel syndrome, sciatic/low back pain, tendonitis, bursitis, work/sports related trauma, fibromyalgia and neuropathy. It is also used as a first aid to minor burns, bug bites, bruising and shingles.

Over time when we are in pain we will seek out new medications available until we've found the one that works. There are many pain relievers available on the market to choose from as you well know. As time goes on and more research is done, many studies have shown some over-the-counter medications have side-effects we were unaware of until now. Which medication to use is a personal descision you make with the aid of your physician. Personally, I have that Topricin does what it promises.

Topricin® is a homeopathic pain relief and healing cream, which studies have shown is safe for use on babies, children, pregnant women, and the elderly. It differs from typical pain relievers because rather than only treating the pain symptom, its trans-dermal,

micro-dosed medicines go deep to where the pain originates and stimulates the body's natural instinct to heal. With no known side effects, I have experienced real, lasting pain relief, which allows me to do those things I enjoy the most; writing about Destinations to Explore. For anyone on the go who may experience joint pain or discomfort this new homeopathic topical cream helps you keep you going and enjoying your trip without resorting to dangerous over-the-counter pain relievers. As with any medication or treatment I suggest seeking the advice of a professional before changing or adding any medications or therapy.

### **Learn More About Topricin®**
